Utilize Excel to efficiently analyse employee data by leveraging functions such as PivotTables, and conditional formatting.

This enables the identification of key trends, such as current employee rates, performance levels. Decision-making processes by visualizing this data through pie chart."

# PROJECT OVERVIEW

This project focuses on analysing employee data to identify trends and insights that can drive better decisions.

Excel will be used to clean, organize, and visualize key metrics such as employee demographics, performance, and retention rates.

The analysis will highlight areas of improvement in workforce management, helping to optimize resource allocation.

Outcomes will include detailed reports and dashboards for management review.

The findings aim to support strategic planning

## WHO ARE THE END USERS?

The end users of the employee data analysis are HR managers, team leads, and senior management.

## OUR SOLUTION AND ITS VALUE PROPOSITION

Conditional formatting-highlights missing cells

Filter- helps to remove the empty cells

Formula - helps to identify the performance of employees  
Pivot table-helps to summarise

Pie chart - shows the data
